

Partners in **Innovation**

Counterplas, your partners in innovation...

Counterplas is a leading technical injection moulder operating within the UK, and has over many years, built a reputation for innovation and excellence. Whether your product exists, or it is at the concept stage, we have the manufacturing and design expertise to satisfy your requirements. We have a large selection of modern, energy efficient machines that range from 40 Tonne to 550 Tonne as well as a fully equipped toolroom within the Group of companies, owned by the Managing Director.

In recent years, we have built upon our injection moulding competence, to become manufacturers of complete products "Under Licence" for a number of UK based blue chip clients. This has led to a number of other competencies being developed at our strategically located West Midlands site; which include

- **Aluminium vacuum deposition**
- **Ultrasonic and hotplate welding**
- **Screen and pad printing**
- **Full electrical testing**
- **Full and sub assembly**
- **Laser etching**

Counterplas has also developed a sophisticated supply chain management structure, that cost-effectively sources products from the UK and abroad. All activities, including in-house processing, bought in services and goods, are encompassed within our BS EN ISO 9001:2008 accreditation.

Most importantly of all, as a leading UK based injection moulder, Counterplas is a financially stable and secure company, with a consistent record of profitability, invest in infrastructure, plant, machinery and people.

INJECTION MOULDING

VACUUM DEPOSITION

QUALITY PRINTING

WELDING AND ASSEMBLY

“Counterplas has also developed a sophisticated supply chain management structure, that cost-effectively sources products from the UK and abroad”

Complete Manufacturing Solutions

Counterplas operates from a modern, 24,000 sq feet facility with direct links to local motorway networks. The site divides into 6 key disciplines of manufacture, which drives finished products into the consignment stock warehouse.

Injection Moulding

Counterplas has a wealth of experience in the injection moulding industry, with 14 machines ranging from 40 Tonne to 550 Tonne.

Ultrasonic & Hotplate Welding

Counterplas offers the facility to weld plastic mouldings together, anneal the components after welding, and test.

Assembly

Counterplas provides an assembly service ranging from sub-assemblies within cycle to the manufacture of complete products.

Aluminium Vacuum Deposition

Counterplas has a 48" Edwards Vacuum Chamber and purpose built spray room, located within a positive air pressure clean room environment.

Quality Printing

Counterplas pride themselves on their printing experience and the high quality of finishes achieved.

Electrical Testing

Counterplas are equipped to test the components and assemblies on site, using a range of standard and product bespoke equipment. Counterplas offers tested units that meet international standards, and are approved for shipping to Europe, Asia, Australasia and USA.

“Working in partnership with our customers, we produce strategies to optimise the supply chain of each product, so that the item can be supplied complete, on time, competitively priced, and quality assured”

Paul Isherwood
